Carlin Light Commercial – Oil & Gas Systems

This new program is a full day program being held at Keystone University, Keystone Sales & Associates training facility with the intention of offering classroom and hands on training for light commercial HVAC systems. This training is perfect for organizations who are currently servicing commercial equipment or organizations who are considering expanding their services.

Carlin Light Commercial – Oil & Gas Systems will cover:

- Installation selection & set up for light commercial oil & gas burners
- Overview of components
- Fuel Systems oil and gas/ oil pumps and gas trains
- Combustion air requirements
- Venting and Commercial Boiler draft set up for breech and over fire
- Understanding commercial burner operation
- Overview of primary controls Oil and Gas
- Low High Low set up and wiring
- Combustion testing
- Troubleshooting
- Outdoor live fire or indoor simulated (weather permitting)
- Hydro-level Controls
- LWCO and water feeder controls for steam boilers
- Installation, wiring, set up and troubleshooting

Our Instructor: Bruce Graham has spent decades in the Oil and HVAC industry, slinging boilers, running service day and night, handling the details that come with being a service supervisor and manager. While doing the same things that students in the classes are doing every day. Bruce has been with Carlin over 10 years, teaching, working in the field with technicians, and serves as a factory representative.

NO REGISTRATION WILL BE ACCEPTED UNLESS ACCOMPANIED BY
PAYMENT IN FULL
